

Simplify schoolwork processes

Education Station

Business Challenge:

- Preprinted bubble sheets are costly to purchase and process, and take up valuable storage space
- Waiting weeks to review test results and assess students' understanding of material can lead to missed opportunities for educational interventions
- Manually preparing test reports and other classroom documents takes valuable time away from lesson planning and other student-focused tasks

Lexmark's Advantage:

The Lexmark Education Station software bundle simplifies schoolwork processes by providing print-on-demand bubble sheet tests, instant grading results and prompt reporting.

Overview

The Lexmark Education Station software bundle is a set of education-specific applications for Lexmark multifunction printers (MFPs). Deployed in or near the classroom, your Education Station transforms paper-based processes into easy and efficient digital workflows accessible with one touch.

Print Test

Prints blank bubble sheets for student testing along with a bar-coded answer key bubble sheet for test scoring.

Grade Test*

Scans the completed answer key and student bubble sheets using OMR software, individually grading tests and producing your choice of printed reports in minutes.

Custom Screensaver

Use the background and idle screens that ship with the bundle, or replace them with your own custom graphics.

How it works:

By seamlessly integrating the versatility and one-touch ease of Lexmark MFP technology with a suite of powerful education workflow solutions, Lexmark helps you manage student testing and classroom paperwork more effectively, giving you more time for student instruction.

Students fill in bubble sheet tests then teacher scans test sheets on MFP.

Test results are available immediately in a variety of report formats.

*Requires a Windows server and Education Station Grading Software.
