

Save Money by Monitoring MFP Usage

MFP Usage

Business Challenge:

Can I automatically track print, scan, copy and fax usage on MFP devices remotely?

Lexmark's Solution:

Easy to install and manage, MFP Usage allows you to track print, scan, copy and fax usage on your customers' installed devices without disrupting End Users. The information is automatically delivered to an email address, a shared folder on the network or through the web interface. All usage information is in one file per MFP without necessitating monthly customer site visits. Ideal for partners that offer click per page on small installations with multiple customers, MFP Usage enables remote management of meter reads.

Features

How does Idle Screen work?

1. Lexmark Expert Partners can access the Lexmark Virtual Solution Centre to download the application.
2. Install the MFP Usage application. (Please read the Installation Guide available from the website).
3. Select the type of usage you need to track.
4. Select the Delivery method for the usage.
5. Reports will be delivered by email at the predefined schedule to the partner with file containing the Device Stats in .csv format. The reports can then be used to bill click per page on the device.

Ideal for:

- Any company wanting to reduce their printing costs
- Sharing print costs over different departments

What are the advantages of MFP Usage?

Save Time

- Once installed and configured, No need for timely site visits to collect meter readings, let MFP Usage manage this for you.

Save Money

- Accurate, timely information means accurate, timely billing when managing click per page contracts, reducing your costs and a positive impacting on your revenue.
